

Kanguru Defender Bio-Elite30™

Fingerprint Access, AES 256-Bit Hardware-Encrypted, Secure Flash Drive

This highly-secure, hardware encrypted USB flash drive defies all tradition of secure flash drives. With fingerprint access, you or a team of others that you authorize can have secure entry to your files with just the tap of a finger. The **Defender Bio-Elite30™**, Biometric flash drive offers Kanguru's best-in-class AES 256-bit hardware encryption, optional remote management capability, and onboard AntiVirus by award-winning BitDefender®, with extra features that take USB encryption to the next level. The flash drive uses your own fingerprint to access the encrypted files, is OS platform agnostic, and has no battery or fussy pinpads to worry about, making this fingerprint flash drive an exceptional data security solution for all types of environments. Just tap and go! The robust AES 256-Bit hardware encryption also provides superior security against leading software encryption fingerprint drives.

- **OS Platform Agnostic (Use On Virtually Any Machine)**
- **USB Powered, No Battery Needed**
- **Better & Easier Than Pinpads/Combo Keypad Devices!**

FEATURES/BENEFITS

- FIPS 197 Certified, 256-bit AES Hardware Encryption (XTS Mode)
- Featuring New Defender Command Console™
- SuperSpeed USB 3.0, USB 3.2 Gen 1x1 (Maintains Compatibility With USB2.0)
- Assign Specific Permissions & Settings For Each Fingerprint or User(s) (up to 6)
- Remotely Manageable
- Real-time, On-Board AntiVirus⁽¹⁾ Scanning By BitDefender®
- RSA-2048 Digitally-Signed Secure Firmware
- TAA Compliant
- Complies with Industry Security Standards such as HIPAA, Sarbanes Oxley, GLBA, GDPR, etc.
- Available Capacities: 16GB, 32GB, 64GB, 128GB
- Customization Available†

PLATFORM

OS Platform Agnostic - No OS needed*, only a USB port to plug the drive in (with autoscan enabled) Windows 10+ or MacOS 10.8+ (with autoscan disabled)

* Does require an initial, one-time setup with Windows 10+ or MacOS 10.8+
